Definitions of Done

Product Name: LEMMA
Team Name: LEMMA
Revision Date: May 24, 2025

DoD for Tasks
- Code is written, committed, and pushed to the feature branch
- Code builds and runs without errors
- Code follows the team's style guide
- Unit tests (if applicable) are written and pass
- Code is tested in a staging/dev environment
- No critical or high-priority bugs remain
- Feature behaves as expected in the UI (if applicable)
- Dependencies are resolved or documented
- Relevant documentation (e.g., code comments) is updated
- The task's output contributes to the completion of the user story

DoD for User Stories
- All tasks for the User Story are complete
- All acceptance criteria are met for the user story
- Code is merged into the master branch
- Unit tests (if applicable) are written and pass
- The feature is tested in a staging/dev environment
- No critical or high-priority bugs remain
- UI (if applicable) follows design specifications and meets Product Owner expectations
- The story is demoed or reviewed with the Product Owner
- The Product Owner accepts the story
- Any relevant documentation is created or updated
